

## **eFFECTOR Therapeutics to Participate in Upcoming Investor Conference**

April 9, 2024

SOLANA BEACH, Calif. and REDWOOD CITY, Calif., April 09, 2024 (GLOBE NEWSWIRE) -- eFFECTOR Therapeutics, Inc. (NASDAQ: EFTR), a leader in the development of selective translation regulator inhibitors ("STRIs") for the treatment of cancer, today announced that the Company will present at the Stifel Virtual Oncology Forum on Tuesday, April 16<sup>th</sup> at 11:30 am ET.

A live webcast of the virtual presentation will be available on the "Events and Presentations" page of the Investors section of the Company's website with a replay available for 90 days following the event. For more information, please visit [investors.effector.com](https://investors.effector.com).

### **About eFFECTOR Therapeutics**

eFFECTOR is a clinical-stage biopharmaceutical company pioneering the development of a new class of oncology drugs referred to as STRIs. eFFECTOR's STRI product candidates target the eIF4F complex and its activating kinase, mitogen-activated protein kinase interacting kinase (MNK). The eIF4F complex is a central node where two of the most frequently mutated signaling pathways in cancer, the PI3K-AKT and RAS-MEK pathways, converge to activate the translation of select mRNA into proteins that are frequent culprits in key disease-driving processes. Each of eFFECTOR's product candidates is designed to act on a single protein that drives the expression of a network of functionally related proteins, including oncoproteins and immunosuppressive proteins in T cells, that together control tumor growth, survival and immune evasion. Zotatifin, eFFECTOR's inhibitor of eIF4A, is currently being evaluated in a Phase 2a expansion cohort in combination with fulvestrant and abemaciclib in ER+ breast cancer. Tomivosertib, eFFECTOR's MNK inhibitor, is currently being evaluated in an investigator-sponsored trial in AML. eFFECTOR has a global collaboration with Pfizer to develop inhibitors of a third target, eIF4E.
