Item 8.01 Other Events.

On September 14, 2022, eFFECTOR Therapeutics, Inc. (the “Company”) announced that it has dosed the first patient in the second cohort of its Phase 1b clinical trial of zotatifin in non-hospitalized adults with confirmed COVID-19 infection. The study is a double-blind, randomized, placebo-controlled trial evaluating the safety and antiviral activity of a single dose of zotatifin and is being conducted in collaboration with the Quantitative Biosciences Institute at the University of California, San Francisco, under a \$5 million cooperative agreement sponsored by the Defense Advanced Research Projects Agency.

Dose escalation to the second cohort comes after the positive recommendation of the independent data safety monitoring board upon review of safety data from the first dose cohort. The completed cohort also included the first subjects dosed with a sub-cutaneous formulation of zotatifin and preliminary analysis demonstrated equivalent plasma drug levels compared to IV delivery.
